A Dread Disease.

The "big head" is a popular way of expressing a common and very frequent ailment. It arises from various sources, but the real foundation is the lack of sense. A little money develops it in some people; a few good clothes gives it to others; a little office, where a chance is given to exercise a little authority, is often the cause of it, while others get it having a little better job than their associates. The truth is, no sensible man gets the "big head." The one who became stuck up and stiff-necked from sources of any kind, are weak in the intellectual caliber.

Out of Sight.

"Out of sight, out of mind," is an old saying which applies with special force to a sore, burn or wound that's been treated with Bucklen's Arnica Salve. It's out of sight, out of mind, and out of existence. Piles, too, and chilblains disappear under its healing influence. Guaranteed by all leading druggists of Wolfe county at 25¢.

A Card.

To the Voters of Wolfe County:

Having been solicited by Democrats from the different precincts of the county to make the race for Sheriff for the next term, I take this method of announcing myself a candidate for said office subject to the will and action of the Democratic primary to be held some time in 1908. This is the first time that I have ever announced as a candidate for any office, but ever since I became twenty-one years of age have been found in the ranks of the party fighting for the success of the principles of the party, which are dear to the heart of every true Democrat, and when the nominees have been selected by the party I have spent both my time and money in securing their election. I ask all voters to consider my candidacy, and if I am nominated and elected I will devote my time and attention to the duties of said office, and that the door of said office will be open during all business hours of the day to transact any business that may come to said office. Soliciting your support, and with best wishes for the "Great Common People," I remain yours, for success,

ROY SMITH.

Sick Headache

When your head aches, there is a storm in the nervous system, centering in the brain.

This irritation produces pain in the head, and the turbulent nerve current sent to the stomach causes nausea, vomiting.

This is sick headache, and is dangerous, as frequent and prolonged attacks weaken the brain, resulting in loss of memory, inflammation, epilepsy, fits, dizziness, etc.

Allay this stormy, irritated, aching condition by taking Dr. Miles' Anti-Pain Pills.

They stop the pain by soothing, strengthening and relieving the tension upon the nerves—not by paralyzing them, as do most headache remedies.

Dr. Miles' Anti-Pain Pills do not contain opium, morphine, chloral, cocaine or similar drugs.

"Sick headache is hereditary in my family. My father suffered a great deal, and for many years I have had spells that were so severe that I was unable to attend to my business affairs for a day or so at a time. During a very severe attack of headache, I took Dr. Miles' Anti-Pain Pills and they relieved me almost immediately. Since then I take them when I feel the spell coming on and it stops it at once."

JOHN J. McERLAIN,
Pres. S. B. Eng. Co., South Bend, Ind.

Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails he will return your money. 25 doses, 25 cents. Never sold in bulk.

ANNOUNCEMENTS.

DYER.—We are authorized to announce Geo. P. Dyer as a candidate for the office of Jailor of Wolfe County, subject to the action of the Democratic party.

Working Man a Conscientious Voter.

No man who goes into an election booth to exercise his right of suffrage is more jealous of that right, more desirous that his action be in the interest of the great masses of the people of his State, and especially of those of his own class, who make up a great majority of its citizenship, than is the man who earns his living and maintains his family by manual labor in workshop, mill and mine. No class of the citizenship of Kentucky more carefully weighs and judges of the merits of the candidates presented, from whom to make his choice nor looks closer into affairs of government considering his opportunities to do so. Appreciating the fact that Kentucky is fast developing its great resources in mineral and other wealth, its brains and its muscles, and its fast taking rank as a manufacturing State, the Democratic party has, during the past eight years, since it returned to power in the State and has managed its public affairs, looked well to promoting legislation which would be to the interest of the working man, and for his welfare not only in his employment but in his home, in the payment of his taxes, in the care of the unfortunate insane, indigent and helpless children, and in the reformation of the criminal classes, for in these the working man has the same interest as any other class of our fellow citizens.

It is charged against the Democratic party in Kentucky by its opponents that it has given more of the public money to the charitable institutions, to the penal institutions, and to the schools of the State than did the Republican party while it was in power from 1896 to 1900, and an effort made to show that this increased expenditure has fallen heavily upon the shoulders of the man who works for his living. In answer to these charges, the Democratic party admits that it has spent more money for these purposes than did the Republican officials, but in making these admissions it challenges the Republican leaders and orators to show that any of such expenditures were foolish or unwarranted. It points with pride to the charitable and penal institutions of the State. From antiquated institutions, the homes for the unfortunate insane have been brought up to the highest standard in their history. Cold storage and ice plants, laundry plants, and modern sanitary arrangements of today have made these institutions the most comfortable homes instead of prison houses which sorrowing relatives and friends were shocked to visit. From darkened dungeons the cells of the penitentiaries have become habitable places, well ventilated, heated and lighted, and the prisons become places of correction and reformation instead of detention camps where the most brutal treatment was formerly administered.

A Criminal Attack

On an inoffensive citizen is frequently made in that useless little tube called the "appendix." It is generally the result of protracted constipation, following liver torpor. Dr. King's New Life Pills regulate the liver, prevent appendicitis, and establish regular habits of the bowels. 25¢ at all leading druggists of Wolfe county.

Missouri's Case Like Kentucky's.

Missouri has been laboring under a difficulty in its tax system nearly exactly similar to that of Kentucky. A tax commission has been at work in Missouri and in line with the tax commissions of other progressive states it has found no solution of the difficulties of the situation short of a constitutional amendment that will give the legislature greater liberty in dealing with the question; but it also points out that such an amendment is chiefly desirable because it will lead to separation of the sources of state revenue from the sources of county revenue.

The comments of the Missouri tax commission are so pertinent to the situation in Kentucky that the following extracts will be found of interest: "We all agreed that the first step in any tax reform is the separation of the sources of state and local revenue. This change would not require the exemption of any class of property from taxation. The proposed change may be effected by the adoption of a single constitutional amendment.

"The general features of this separation of the sources of state and local revenues may be briefly summarized. The state would discontinue the levy of a general property tax upon the real and personal property of the state, leaving the assessment and collection of this tax to the counties and municipalities for local purposes. This would make a saving of the large expense incident to the present dual system. It would also dispense with the work of the State Board of Equalization connected with the attempted equalization of assessments of real and personal property among the counties of the state.

"The state would thereafter derive its revenue through its inherent general power of taxation upon general subjects of taxation, as by licenses, corporation taxes, inspection fees and such other forms of taxation as the general assembly may determine.

"The different rates of assessment in the different counties, enforced by the different demands for local revenue, would no longer produce inequality in taxation with reference to the state tax. The remedy proposed is, in our opinion, the only effective remedy. Each community could fix its own rate of valuation as its local needs may require, without subjecting its citizens to the injustice of being compelled to pay an undue share of state taxation.

"There is now a certain kind of home rule in taxation, which consists in the variation of the rates of assessment upon property according to the local needs of the community, some counties paying taxes on 70 or 80 per cent of the real value of property, and others only 20 or 30 per cent. The report of the Tax Commission of 1903 says: It is in the bounds of truth to say that no two counties of the state have the same rule for the assessment of all classes of property, and generally speaking, there is absolutely no uniformity as to the proportion of the cash value taken as a basis of the assessed value. Some counties value real estate, so far as our reports show, as low as 30 per cent of its selling price, while others have a 90 per cent basis. Some assess real estate at 33 1/3 per cent, and tangible personal property at 50 per cent. The commission concluded that there was an absolute want of equality in taxation.

"This inequality can not be remedied by the State Board of Equalization, for the obvious reason that the high rate of assessment in certain counties, including the city of St. Louis, is enforced by the pressing demand for revenue for local requirements. The board can not raise the assessments of the counties which make a low valuation, as that would be imposing an unnecessary burden upon those communities.

"We see no remedy for this existing inequality and resulting injustice, except in the separation of the sources of state and local revenue.

"Under the plan proposed, the state would retain all of its inherent powers of taxation, except as to the general property tax upon real and personal property, which would be assessed and collected by counties and cities for local purposes. The state now levies a tax upon insurance companies, drams, express companies, sundry corporations, license and inspection taxes, and a collateral inheritance tax. What other forms of taxation may be adopted will be for the General Assembly, in its discretion, to determine. The system proposed requires no change in the existing limitations upon the tax rates of the counties, cities and school districts.

"The change recommended requires no modification of the methods of assessing the property of railroads and other public service corporations by the State Board of Equalization. That system is statutory and its continuance or modification is subject to the control of the General Assembly. Should the present system be continued, whereby the assessed valuation made by the state board is apportioned to the counties, the General Assembly should continue the present state tax upon such valuation and provide for its direct payment into the state treasury."

Circulate the Money at Home.

One of the many growing evils of this country today is the city department store. In our town, where we have the best of stores, the most honorable of merchants, and where goods are sold at a margin so small as not to afford a respectable living to our business men, thousands of dollars are annually sent to the department stores of our great cities. Farmers expect our merchants to pay them a fancy price for butter, eggs and poultry, for their pumpkins, potatoes, apples and tomatoes, and they take the money received from our home merchants and send it to a city department store. There is neither economy or honor in such a manner of doing business. You can write it down in your hat, that as a rule, the department store is a swindle. Our citizens who patronize them should be compelled to ship their butter and eggs to them. There is not a business man in our town who will not duplicate their prices for the same quality of goods, and he who turns down his home merchants to patronize these fakirs is far from being a good citizen.

THE HERALD.

Take a Good Start.

No matter what you do, provided you do it better than some one else could do the same thing, there's a welcome awaiting you in the world. It was Emerson, we believe, who said: "If a man can write a better book, preach a better sermon, or make a better mouse trap than his neighbor, though he builds his house in the woods, the world will make a beaten path to his door." Try to excel—it's a laudable ambition. As a starter take a course in our schools.

Hard Times in Kansas.

The old days of grasshoppers and drouth are almost forgotten in the prosperous Kansas of today, although an old citizen of Codell, Earl Shamburg, has not yet forgotten a hard time he encountered. "He says: 'I was worn out and discouraged by coughing night and day, and could find no relief till I tried Dr. King's New Discovery. It took less than one bottle to completely cure me.' The safest and most reliable cough and cold cure and lung and throat healer ever discovered. Guaranteed by all Wolfe county druggists at 50¢ and \$1.00. Trial bottle free.

Build on Brain.

Young men, you are the architects of your own fortunes. Rely upon your own strength of body and soul. Take for your star, self-reliance. Don't take too much advice—keep at your helm and steer your own ship, and remember that the great art of commanding is to take a fair share of the work. Think well of yourself. Strike out. Assume your own position. Put potatoes in a cart over a rough road, and the small ones go to the bottom. Rise above the envious and jealous. Fire above the mark you intend to hit. Energy, invincible determination, with a right motive, are the levers that move the world. Be in earnest. Be self-reliant. Be generous. Be civil. Read the papers. Advertise your business. Make money, and do good with it.

A Picnic Party.

Quite a number from our town took an outing in the country Saturday last, among whom were the families of Hal Smyth and John Ward, Prof. and Mrs. Carter, Mrs. Dye, Misses King, South, Gridley and Sallee, teachers in the Academy; Miss Lula Eaton, of Mt. Sterling; Misses Arta Dye and Lizzie Wells; Messrs. Clayborne Johnson, Charles Seale and Jim Perry Alexander; also Mrs. Even and daughter, Golden, of Helechwana. They visited the saw mill belonging to Ayres & Smith, on Grassy, and the ladies never found so much pleasure as when riding on the tram-car of the saw carriage. Dinner was served on the open green, and having been prepared for the occasion by the skilled hands of Mrs. Dye and Smyth, made it something to be enjoyed hugely. All are indeed anxious for another September outing.

Don't Scoff at Religion.

That the churches in any community exercise a most potent influence for good, is conceded by all except the most rabid or blatant infidel whose egotism and self-conceit blind his mind to the inestimable value of Christianity. But to what extent are the churches valuable in this community? The Galilean teacher said of His disciples: "Ye are the light of the world." "Ye are the salt of the earth." Hence, if all His disciples are the light of the world and the salt of the earth, the logical conclusion is that they are the light of the community in which they live. These declarations, however, do not preclude the possibility of the light going out—being hid under a bushel—or the salt losing its saltiness. But certainly no reasonable or fair-minded persons would accuse the churches of being wholly composed of united bands of hypocrites. For it matters not to what extent sin, in its many forms, may pervade the ranks of any church, you will find, within its membership, consecrated men and women. And it should be borne in mind that it only requires

A Hung Jury.

The jury in the case of George Dykes, who stabbed Hawk Tutt, got the case Thursday of last week and reported to the judge several times that they could not agree. Judge Riddle, anxious to rid the docket of the case, sent them back each time, until they reported finally Monday morning that they could not possibly agree, when he discharged them. The jury stood six for acquittal and six for conviction. At the last Circuit Court the jury disagreed, and then stood eight for acquittal and four for conviction. It looks like a verdict may never be reached in this case unless a jury be summoned from some other county.

James Hollon last week set up a stave mill on Lacy creek, and began bucking Saturday. The mill has a capacity of about 6,000 staves a day, and Mr. Hollon has timber enough to run it several months. He is turning out a fine lot of material.

ONE DOLAR BUYS "The Mountain People of Kentucky."

This popular book, which is now in its fourth edition, will for a limited time be sold for \$1.00 the copy, postage prepaid to any point in the country. Press and people are loud in praise of it, and patriotism prompts many to buy it. Why not you? You will want it for your children.

No better testimony to the worth and success of that most admirable work done for the Kentucky mountaineers may be found than this book by Wm. H. Haney a mountain boy. Mr. Haney is 23 years old, he was born in Morgan County and is an excellent example of self reliance typical of his sturdy race. He has conquered difficulties of poverty and other hampering circumstances, defraying the expense of his own education by the work of his hands while he was at Hazel Green Academy, Berea and Kentucky State College. Meantime he has purchased a home for his father and mother, has written this book—and again it may be repeated that he is only in his twenty-fourth year.

Two purposes seem to animate the pages of this book: To describe mountain life as it actually is; and to correct the wrong impressions of it others have striven to foist on the public. Mr. Haney gives an historical sketch of the mountain people, attributing to inherited traits and the Kentucky environment the characteristics that distinguished them. Social conditions, Feuds, Industries, Education, Politics, Religion and the "Outlook," successfully afford Mr. Haney subjects for interesting discussion. He has known mountain life in its earlier conditions as well as in recent years when conditions have been somewhat improved, great as is still the need for more improvement and for earnest help from the outside world beyond the mountains. Though, indeed one of the wisest things Mr. Haney says is that it is not only help from beyond the mountains that is needed. As he suggests, that if the mountain people who have had the benefit of education will give some of their lives to those of their blood whom they understand better than alien teachers could do, this will be a decided gain for the mountain communities.

Mr. Haney writes in a direct style, in good English that reflects credit both on his own industry and his teachers. He is intelligent, sympathetic, optimistic and loyal in his considerations of the mountain people. He recognizes the need for industrial improvements, the teaching of scientific farming and other immediate needs as well as the higher needs of these people who offer such a splendid challenge to the worker in sociology, education and religion.—Courier-Journal.
